

## Methodology

HIPAA 45 CFR Part 160 and Part 164, Subparts A and C set security standards and require each covered entity to adopt administrative, physical, and technical safeguards. STANDARD § 164.308(a)(5) requires that a covered entity must “Implement a security awareness and training program for all members of its workforce (including management).” Regardless of how complete or detailed your safeguards are they will not protect ePHI if the workforce is unaware of its role in adhering to and enforcing them.

## The Results

Developing and delivering security training is a crucial component of any successful and compliant security program. Having your work force not just attend but consume and digest the training is a challenge we can overcome.

A recent client wrote:

**“Many thanks to our expert Consultants - the training was terrific. Our consultants (with the same hair stylist) received many compliments from the staff after the training was complete. :- ) Loved the humor that you weaved in throughout!”**

## CSB IT Security Experience

Why CSB IT Security?

Healthcare CIO executive experience

Certified technical experts

Risk Assessments that have passed CMS and OCR audits

Security experience with diverse healthcare organizations –  
hospitals, large physicians groups, HIEs, managed care  
organizations, IPAs and business associates

Modular approach designed to meet the practical needs of  
healthcare organizations

Practical solutions to combat the increasing threat of Hackers
